## Travaux pratiques : devoir 1

## 2.2.17

$$P(F|p1) = 0.5$$
  $P(F|p2) = 1$   $P(F|p3) = \frac{1}{3}$ 

(a) 
$$P(F) = P(F|p1) \times P(p1) + P(F|p2) \times P(p2) + P(F|p3) \times P(p3)$$
  
 $P(F) = 0.5 \times \frac{1}{3} + 1 \times \frac{1}{3} + \frac{1}{3} \times \frac{1}{3} = \frac{11}{18} = 0.611$  (Thm des proba totales)

(b) 
$$P(p2|F) = \frac{P(F|p2) \times P(p2)}{P(F)} = \frac{1 \times \frac{1}{3}}{\frac{11}{18}} = \frac{6}{11} = 0.545$$
 (Thm de Bayes)
